

REBUILDD - DIGITAL PRODUCT PASSPORT

PRODUCT AND DPP IDENTIFICATION

PARAMETER	DESCRIPTION	VALUE
Product ID	Unique component or instance identifier (instance/batch level)[text]	WP001
Global Trade Identification Number	Unique international code used to identify products and trade items (Model level) [text]	
Product name	Name or title of the product [text]	Paperweight REBUILDD
Product type	Category or classification of the product [text]	Loose Furniture and Accessories
Date of creation	Date when the Digital Product Passport (DPP) was created [AAAA-MM-DD]	2026-08-31
Date of update	Date of the most recent update [AAAA-MM-DD]	2026-08-31
Passport version	Version number of the Digital Product Passport (e.g., v2.0) [text]	v1.0

PRODUCT USE AND SAFETY INFORMATION

PARAMETER	DESCRIPTION	VALUE
Technical Data Sheet	Technical specifications and key product characteristics relevant to its use and performance. Add the link to the documents [text]	https://supsi-my.sharepoint.com/:i:/g/personal/leidy_guantehenrique_supsi_ch/IQCjV3LyfOxnRoswMwFzX9YmAaYbPWewBD6q1TM1gZTLTr4?e=daXaD9
Manuals & Instructions	Instructions and user manuals required for the correct use, installation and maintenance of the product. Add the link to the documents [text]	
Safety Information	Key information required to ensure the product is used safely and to prevent potential risks during normal use [text]	Clean using only a damp cloth, avoiding acid or abrasive detergents that corrode the cement matrix.
Warnings	Specific warnings highlighting hazards, prohibited uses or precautions that require particular attention [text]	Heavy object, handle with care to avoid personal injury or surface damage from accidental falls; in case of violent impact, it may shatter generating sharp fragments and irritating dust.

ECONOMIC OPERATORS AND SUPPLY CHAIN

PARAMETER	DESCRIPTION	VALUE
Manufacturer_Company Name	Name of the company legally responsible for manufacturing and placing the product on the market [text]	SUPSI Fablab
Manufacturer_Contact Details	Contact information of the manufacturer [text]	fablab@supsi.ch
Manufacturer_Unique Operator Identifier	Unique identifier assigned to the manufacturer [text]	CHE-123.456.789
Importer_Company Name	Name of the company that imported the product into the EU [text]	SUPSI Fablab
Importer_Contact Details	Contact information of the importer [text]	fablab@supsi.ch
Importer_EORI Number	Unique number identifying the importer for customs purposes [text]	IT01234567890
Importer_Unique Operator Identifier	Unique identifier assigned to the importer [text]	CHE-123.456.789
EU Responsible Economic Operator_Company Name	Name of the EU-based operator responsible for product compliance [text]	SUPSI Fablab
EU Responsible Economic Operator – Contact Details	Contact information of the responsible economic operator [text]	fablab@supsi.ch
EU Responsible Economic Operator_Unique Operator Identifier	Contact information of the responsible economic operator [text]	CHE-123.456.789
Other Economic Operator_Company Name	Name of another economic operator involved in the supply chain [text]	
Other Economic Operator_Role	Role of the operator within the product supply chain [text]	
Other Economic Operator_Unique Operator Identifier	Unique identifier assigned to the economic operator [text]	
Production Facility_Name	Name or identification of the physical facility where the product is manufactured or processed [text]	SUPSI DACD
Production Facility_Location	Location of the relevant production facility [text]	Via Flora Ruchat-Roncati 15, 6850 Mendrisio
Production Facility_Unique Facility Identifier	Unique identifier of the relevant production facility, where applicable [text]	7612345000019

DPP INFRASTRUCTURE

PARAMETER	DESCRIPTION	VALUE
DPP Service Provider_Company Name	Identification of the service provider hosting the backup copy of the Digital Product Passport [text]	4R ⁿ D
DPP Service Provider_Contact Details	Contact information of the DPP service provider [text]	info@4rnd.ch
Backup DPP Reference	Reference (e.g., link) or identifier used to locate the backup copy of the Digital Product Passport [text]	https://supsi-my.sharepoint.com/:f:/g/personal/leidy_guantehenrique_supsi_ch/IgAdRWouidxPSKwR5Jet3SK_ATPGp5j1QmVPJAh7Cvkqixo?e=73PbYM

TRACEABILITY AND ACCESS CONTROL

PARAMETER	DESCRIPTION	VALUE
Data Carrier Type	The physical technology used to link the product to its digital passport (e.g., QR Code, NFC Tag, RFID) [text]	QR Code
Data Carrier Link / Web URI	The persistent web address (URL) embedded within the QR/NFC that redirects the user to the Digital Product Passport [text]	
Data Visibility Level	Access privacy status of the passport (e.g., Public, Restricted) [text]	Public
Target Audience	Authorized user groups allowed to access the data (e.g., Public, Authorities, Recyclers) [text]	Public

ITEM LIFECYCLE HISTORY

PARAMETER	DESCRIPTION	VALUE
Year of production	Year or date when the product was manufactured [AAAA-MM-DD]	2026-08-26
Year of installation	Year or date when the product was installed or first used [AAAA-MM-DD]	2026-08-31
Expected service life	Projected functional lifespan of the product in years [number]	50
Previous use	Brief description of the former function and location of the product or material in its previous lifecycle (if no previous use, indicate "None") [text]	None
Previous number of use cycles	Total count of previous use cycles or life loops the product/material has undergone (if no previous use, indicate "None") [number]	None
Duration of previous use	Total operational duration or time span of the previous use cycle, e.g., in years or months (if no previous, indicate "None") [text]	None
Last transformation	Description of the most recent physical or chemical modification applied to the product (e.g., cut to size, repainted, re-machined; if original/unmodified, indicate "None") [text]	None
Physical condition	Current physical or operational state of the product (e.g., New, Good, Worn, Damaged; if brand new, indicate "New") [text]	New
Maintenance and Repair log	Record or documentation link of past routine maintenance and repair events performed during use (if none, indicate "None") [text]	
Refurbishment and Remanufacturing log	Record or documentation link of major industrial overhaul, refurbishment, or remanufacturing processes (if none, indicate "None") [text]	

MATERIAL AND PRODUCT SPECIFICATIONS

PARAMETER	DESCRIPTION	VALUE
Bill of Materials (BOM)	Complete material breakdown. Format strictly as "Material: Percentage%", separated by commas (e.g., Pine wood: 70%, Memory foam: 20%, Leather: 10%) [text]	Concrete: 100%
Material(s) additional Information	Additional information regarding the composition, type, specification, manufacturer, or other relevant characteristics of the material(s) [text]	Concrete based on ECOPlanet CEM VI (S-LL) 525 L NF cement.
Net weight	Total physical mass of the product. Format strictly as "Value Unit" (e.g., 2.5 kg) [text]	
Dimensions	Overall dimensions or bounding box. Format strictly as "L: XX, W: XX, H: XX Unit"m(e.g., L: 50, W: 40, H: 90 cm) [text]	
Technical properties (Max 3)	Up to 3 defining physical/mechanical traits. Format strictly as "Property: Value Unit", separated by commas (e.g., Density: 970.5 kg/m ³ , Compressive strength: 5 MPa) [text]	Density: 2400 kg/m ³
Critical Raw Materials	Presence of EU-listed critical raw materials (e.g., Lithium, Cobalt). Format as a comma-separated list, or indicate "None" [text]	None
Substances of Concern	Declaration of hazardous pollutants or SVHCs (e.g., toxic flame retardants, lead). Format as a comma-separated list, or indicate "None" [text]	None

MATERIAL CIRCULARITY

PARAMETER	DESCRIPTION	VALUE
Renewable Content	Percentage of the product's total material content derived from renewable biological resources. For each material listed in the BOM, provide the percentage of renewable content. If the product consists of a single material, the user may provide only the percentage without repeating the material name. Format strictly as "Material: Renewable content%", separated by commas (e.g., Pine wood: 100%, Memory foam: 0%, Leather: 0%) [text]	0%
Recycled content	Percentage of the product's material content originating from recycled materials. For each material listed in the BOM, provide the percentage of recycled content. If the product consists of a single material, the user may provide only the percentage without repeating the material name. Format strictly as "Material: Recycled content%", separated by commas (e.g., Pine wood: 20%, Memory foam: 0%, Leather: 0%) [text]	35%
Reused Content	Percentage of the product's material content that has been reused. Identify the components that have been reclaimed from a previous use and incorporated into the product. Format strictly as "Material: Reused content%", separated by commas (e.g., Pine wood: 0%, Memory foam: 100%, Leather: 0%) [text]	0%
Material Recyclability	Percentage of the product's material content that is technically recyclable at end of life under stated recycling conditions. Format strictly as "Material: Recyclable content%", separated by commas (e.g., Pine wood: 100%, Memory foam: 50%, Leather: 0%) [text]	100%
Material Reusability	Percentage of the product's material content that can potentially be reused without being recycled into a new material. Format strictly as "Material: Reusable content%", separated by commas (e.g., Pine wood: 100%, Memory foam: 100%, Leather: 0%) [text]	100%
Decomposable / Compostable Content	Percentage of material content that can biologically decompose under specified end-of-life conditions. Format strictly as "Material: Compostable content%", separated by commas (e.g., Pine wood: 100%, Memory foam: 0%, Leather: 0%) [text]	0%

PRODUCT CIRCULARITY

PARAMETER	DESCRIPTION	VALUE
Disassembly Potential	Degree to which the product or its sub-assemblies can be disassembled at end of use without causing damage to components or surrounding materials. (Metric: Rating score, e.g., High / Medium / Low / Not Applicable) [text]	Not Applicable
Product Reusability	Indicates whether the entire product in its integral form can be recovered and reused for the same or a similar intended purpose. (Metric: Yes / No) [text]	Yes

ASSEMBLY AND DECONSTRUCTION PROFILE

PARAMETER	DESCRIPTION	VALUE
Connection Type	Type of interface used to attach the product to its surrounding system, building, or environment (e.g., Freestanding/Unattached, Dry mechanical joint, Wet joint, Adhesive, etc.) [text]	Freestanding
Connection Accessibility	Ease with which the interface connecting the product to its surrounding environment or system can be reached using standard tools for maintenance or removal (e.g., Fully accessible, Partially accessible, Inaccessible, Not Applicable) [text]	Not Applicable
Product Independence	Degree to which the product can be extracted or replaced without needing to dismantle, alter, or destroy adjacent products or the surrounding structure (e.g., Independent, Dependent, Embedded/Monolithic)	Independent
Component(s) Reusability	List of the product's components indicating whether each can potentially be recovered and reused independently. Format strictly as "Component: Yes/No", separated by commas (e.g., Wooden frame: Yes, Upholstery: No, Metal fasteners: Yes). If the product is not composed of separate sub-components, enter "Not applicable" [text]	Not Applicable
End-of-Life Pathways	Identified management scenarios for each individual component of the product at the end of its lifecycle. If the product consists of a single part, the pathway applies to the item as a whole. Format strictly as "Component: Pathway", separated by commas (e.g., Wooden frame: Recycling, Upholstery: Reuse, Metal fasteners: Reuse) [text]	Recycling

ADDITIONAL ENVIRONMENTAL INFORMATION

PARAMETER	DESCRIPTION	VALUE
Embodied Carbon (GWP)	Carbon footprint of the product calculated as Global Warming Potential (GWP-total), quantified in kg CO ₂ eq. per functional unit according to EN 15804+A2 (Modules A1–A3/A5/C1–C4). Format strictly as "number + unit" [text]	
EPD Reference Link	Direct link or persistent identifier (e.g., DOI, URL) to the verified Environmental Product Declaration (EPD) compliant with EN 15804 / ISO 14025 [text]
